📍 Vanuatu - Pele Island

Support conserving the sea life in Vanuatu by taking part in our Marine Conservation program where you will be able to spend some quality time by the beach!

Throughout your time under this project, you will be supporting the supervisors to correctly place the materials and complete planting a coral reef to protect sea life. Your time at the project will not only benefit conserving marine life but also give you one of the most memorable experiences in your life.

Program Description

If you are a person craving to dive and snorkel in the beautiful waters of Vanuatu, this would be the ideal project for you. By joining the project, you will not only be able to satisfy your craving for diving and snorkelling but also you will be able to give back to this beautiful country. Throughout the project period, you will be assisting our experts to plant a coral reef by transporting grids to preselected sites and positioning them correctly on the ocean floor and collect other natural materials on the mainland and Pele Island to be placed on the grids for coral planting. Since you will be diving in shallow waters, a diving certificate is not compulsory. However, the proper diving experience would be an additional benefit as it may be useful for specific tasks.

Program Duration & Availability

Min duration (weeks): 1

Aims & Objectives

To support sustainable development in Vanuatu by making efforts for marine conservation.

Schedule

Monday to Friday

- Collecting materials from the mainland and transporting them to the required location in the ocean
- Transporting grids to the preselected sites
- Placing grids correctly on the ocean floor
