Community Engagement

Physical Demand

## Program Description

You will be given a great opportunity to serve our community. It is your chance to prove yourself as an effective healthcare participant.

You will help in our endeavours to improve community knowledge on important healthcare matters and encourage the local people to get used to healthier lifestyles. You get a chance to inspire children to pursue a medical career while spending time with locals and gain exciting knowledge and memories. You will also be a part of our community in developmental projects.

You will be spreading knowledge on various healthcare topics and giving presentations at our local playschool. You will also give lessons and teach locals about topics such as CPR, First Aid, Child development, Healthy baby, Nutrition adapted to the island resources, how to develop physical and mental health etc. The community is not shy at all and they may ask for further topics.

You will help empower local women and enhance their knowledge of improving one's health. You are free to choose topics, which you consider important to inform locals -especially women- about. Moreover, we can arrange visits to another local health centre and hospital situated at a nearby island, in order for you to meet other doctors, who can answer all your questions and get the first-hand experience on local facilities and procedures.
