📍 Indonesia - Pejeng (Ubud)

Spend your time to enhance the IT skills and knowledge of high school students in Ubud and inspire them to dream beyond the horizon.

Help the students with their questions and support their learning and IT training. Help them to build their careers in IT by initiating a passion to learn and aim high in life. Join the program where you would teach the students from the basics of Microsoft Office to advanced programming and academic uses of software.

Program Description

IT skills are mandatory in the present world for any individual no matter what career and what position they are in. And it is also important that the students get proper training and knowledge in IT from the school itself. This program aims to help high school students to enhance their IT skills and support their studies of IT with the help of our passionate individuals who would like to make a difference.

You do not have to be an expert in IT to join this program, but you are required to be eager to help the students and learn and enjoy the time with the students. Your students are extremely eager to learn and are an absolute joy to teach. On this project, you will be spending about four hours each morning and in the afternoon you in preparing lessons. It is entirely up to you how you want to teach, however, there is a general syllabus for you to follow and examples of what previous participants have taught for you to continue with.

Your students will be from 11-15 years olds from Junior high school & high school. If you are new to teaching, you may wish to team up with other fellow participants, as two to three teachers in the classroom often work well with regard to confidence-building and gaining greater control of the class whose enthusiasm often spills over into great excitement!
